

AN ACCOUNTANT'S GUIDE TO SETTING CAREER OBJECTIVES IN A GLOBAL PANDEMIC

Even during times of uncertainty, you can learn how to use your time effectively as an accountant to set career goals.

Core values

Assessing your values can highlight time for a change. Aligning what's important to you to an employer's Employee Value Proposition (EVP) can be extremely beneficial. From employee development to giving back -- there's an accountancy firm for you.

If I had time

Accountants are expected to continually develop professionally, but it might be an ideal time to add qualifications and skills that will boost your CV or provide specialist knowledge, such as new software skills.

Short-term and long-term goals

Although it's best to predict a frequent change in the current circumstances, it's still a good time to plan self-development in the short and long-term. From online training to aspirations to be a senior team member, separate what's achievable by time: short (months) and long (years).

Schedule it in

Making yourself accountable and setting reminders with free software like Todoist will make your career goals and self-development a success.

Still hiring

Many accountancy firms are still hiring, but they have a larger pool of talent. That's why it's essential to give your CV an overhaul and use your time effectively to bring any skills up to date.
